2012 NGBS 601.2(2)	Higher-grade or higher strength of the same material than commonly specified for structural elements are used.	3	None.
2012 NGBS 601.2(3)	Performance-based structural design is used to optimize lateral force-resisting systems.	3	None.
2012 NGBS 601.3(2)	Building dimensions & layouts reduce material cuts & waste in at least 80% of wall area.	3	Must be used for at least 80% of the wall system.
2012 NGBS 601.4	Detailed framing/structural plans, material lists, on-site cut lists for framing/structural materials are provided.	4	None.
2012 NGBS 601.5(2)	Wall Systems	4	None.

2012 NGBS 606.1	Biobased products are used. 8 points maximum awarded.	3-8	Two biobased products must be used to earn points for this practice. BamCore would count as 1 product. To earn 3 points, the products must be more than 0.05% of project's construction costs. To earn 6 points, the products must be at least 1% of the construction material cost must be used. More points are available for using additional biobased materials.
